

FODDER BEET HARVESTING

Fodder beet harvesting is just around the corner and we are raring to go.

Operating the Vervaet Harvester we believe we have the following advantages:

- Huge cleaning capacity
- Low ground pressure
- Easily adjusted from the common 45 and 50cm row spacings
- Proven performance with very low beet losses
- Experienced operator second season on harvester
- Harvester maintained to a high standard for reliability

18 tonne trailers on floatation tyres on 200+ horse power tractors available for short carts with hydraulic opening tail doors for efficient and cost effective cartage.

JCB loader with two tonne beet bucket for reloading when required.

Ring Ken now for cost effective beet harvesting.

NEW SERVICES

We have this drill on a 200 horse power tractor with GPS Auto steer guidance for improved accuracy.

Ring Ken for a competitive price on all your Drilling needs.

FEED FOR SALE

Fodder beet - We have harvested fodder beet available to deliver to your farm from the 1st April. Fodder beet is an excellent high energy feed and there are big advantages of feeding harvested beet.

Straw - We have had a busy straw baling season and due to the dry conditions orders have been strong. We still have a limited amount of straw available.

Grain - We have feed grain available to us - all inquiries are welcome.

Silage - Baleage is in short supply this year but we are managing at this stage to still source it and fill our customers requirements.

Contact Andy for all Feed Sales - inquiries 021 360 052
